

In Brief

Opto Circuits to make Press Club Mumbai 'Heart-safe'

Opto Circuits (India) Ltd, has gifted a *Powerheart*® G3 Plus Automated External Defibrillator (AED) to the Press Club Mumbai, enabling the club to become a heart-safe environment for all its members. An AED is emergency medical equipment that can be used in clubs, offices and any public spaces by ordinary bystanders to resuscitate victims of Sudden Cardiac Arrest (SCA), a fatal eventuality that can happen to anyone at anytime. The Press Club Mumbai is the second organisation in India after the Bangalore Metro Project to have understood the significance of the issue and to have accepted an AED.
