

## **Opto Circuits' US subsidiaries showcase their products in The World Forum for Medicine – MEDICA 2010**

**Bengaluru, India | Düsseldorf, Germany  
November 17, 2010**

Opto Circuits (India) Limited and its US-based subsidiaries – Unetixs Vascular, Inc., Criticare Systems, Inc. (CSI) and Mediaid, Inc. are participating in The World Forum for Medicine, the MEDICA in Dusseldorf starting today. CSI's line of vital care monitors including the new eVision™, nCompass™, nGenuity™, VitalCare™, eQuality™ and Criticare Connect™ will be showcased at this year's MEDICA. Latest technologies in pulse oximetry by CSI will be part of the show as well. The company has sales and engineering personnel available at Hall 9, Booth C26. Unetixs Vascular, Inc.'s Revo®, the most up-to-date technology in peripheral arterial disease diagnosis will be exhibited this year. This system enables a technologist to perform non-invasive, simultaneous bilateral ankle (or toe) brachial index (ABI or TBI) tests.

eVision™ is the first modular, scalable 'green' monitor that includes a trickle charge solar panel, has a touch-screen display and an interactive user interface.

eQuality™ is an affordable monitor with features for both spot checks and continuous monitoring.

nCompass™ and nGenuity™ can monitor adult and pediatric patients in virtually every department. The user interface features simplified menus and dedicated function keys for timely setups.

The VitalCare™ Series of patient monitors can be used for spot-checks or to continuously monitor three critical parameters. It is designed for maximum mobility, versatility and cost-effectiveness.

MEDICA is the world's largest event for the medical sector, with participation of medical experts from approximately 115 countries. Innovations from the medical sector and medical research are presented.
