Dear Sir

Subject: Press Release.

We would like to inform you that M/s Eurocor GmbH an Opto Circuits (India) Limited company acquires patent application for bioresorbable stents.

We are enclosing herewith the press release issued by the company regarding the new orders from Philips Health Care.

This is for your information.

Thanking you,

Yours faithfully,
for OPTO CIRCUITS (INDIA) LTD.,

Authorised Signatory

PRESS RELEASE

Opto Circuits subsidiary Eurocor acquires patent application for bioresorbable stents.

Opto Circuits (I) Ltd. (OCI)'s wholly-owned subsidiary Eurocor GmbH, an international leader in vascular devices, such as stents and Drug Eluting Balloon technology, related services and solutions, announces the acquisition of a patent application related to bioresorbable stents.

Bioresorbable stents represent a novel alternative to traditional vascular stent technology. This novel stent design uses a material combination of metal and polymer which combines the advantage of bioresorbable and robust stent properties. The patent grant will bolster the extension of Eurocor product portfolio to include bioresorbable devices, capable of addressing significant new markets and customers globally.

Lalit Mamtani, CEO of Eurocor GmbH, commented: "In-stent restenosis is a potential problem in coronary and peripheral lesions that are treated with non-resorbable stents. Since the launch of our patented Drug Eluting Balloon (DEB or DCB) product range, Eurocor has invested in future technology that avoids having to leave metal behind in coronary and peripheral lesions. With the Bioresorbable stents we are excited to extend our patented and novel product technology and to provide metal free, fully resorbable stent products."

About Eurocor GmbH

Eurocor is a rapidly growing European Life Sciences Technology Corporation specializing in the research, development and manufacture of cardiovascular and endovascular products. Eurocor provides interventional physicians with innovative coronary stent technologies and special cardiovascular and endovascular devices, manufactured in Europe. Products are indicated for minimally invasive cardiovascular and peripheral surgery and comply with biological and biomechanical principles to offer highly flexible, adaptable solutions. Extensive research and development, close clinician collaboration, outstanding quality standard philosophy and global scientific alliances lead to optimization of clinically effective technologies. Eurocor has designed an innovative method for balloon catheter drug delivery with high patient compliance.

One heartbeat ahead® – with innovative products such as DIOR® and FREEWAY™

Eurocor GmbH is a wholly owned subsidiary of Opto Eurocor Healthcare Limited and is part of the Opto Circuits Group. For more information, please visit eurocor.de and optoindia.com
